

For all your metal recycling needs

JMC Recycling Systems

Strip-Tec 3000 Cable Stripper

The Ultimate in Cable Stripping Technology

One of the most popular cable strippers in the USA is now available in Europe for the first time. The Striptec model 3000 is able to handle cable from 1/8" to 2 1/2" diameter. The machine has been designed for simple dependable operation, without the need for constant adjustment to suit different material sizes.

- ➔ **Strips any length of wire**
- ➔ **Simple dependable operation**
- ➔ **Fast and efficient core stripping**

Background

JMC Recycling Systems Ltd was formed from J.McIntyre Machinery Ltd in 2003 to manufacture the McIntyre range of Metal Recycling equipment. McIntyre machines have been sold worldwide since 1975, and many of the company's original units are still in constant daily use. The Striptec Stripper is one of the few products manufactured by external companies to become part of the JMC product range. Before introducing a new product of this type, we have to ensure that the equipment is able to offer our customers the same levels of quality and longevity of service that they expect from our own range of McIntyre metal recycling systems.
